Ecological Research (2002) 17, 725–732

Subject Index

A
aboveground biomass
  dwarf communities in nitrogen-rich habitats 109
abundance
  co-dominants in ecological communities 519
  impacts of dugongs on benthic communities 625
acorn hoarding
  acorn hoarding and regeneration of *Pasania* 553
adult preference
  naturalized thistle and *E. pustolosa* 275
aerial survey
  distribution and abundance of seals 79
agricultural landscape
  bird strategies and habitat changes 339
Akebia quinata
  floral sexual dimorphism in *A. quinata* 295
algal senescence
  territorial defense by ayu 373
allochthonous inputs
  seasonal subsidy and food web stability 433
allochthonous resources
  resource partitioning and food web stability 419
allometry
  fertility level and self-thinning 17
  allometry and life history of *P. coronata* 323
altitude
  PNUE at different altitudes 305
  male aggression and diapause in mites 645
Aphrophora pectoralis
  spittlebug oviposition affects shoot growth 535
apical dominance
  spittlebug oviposition affects shoot growth 535
Apodemus mice
  acorn hoarding and regeneration of *Pasania* 553
arbuscular mycorrhiza
  soil food webs and plant communities 217
archaea
  prokaryotic and viral diversity 183
architecture
  allometry and life history of *P. coronata* 323
arctic
  growth responses to experimental warming 125
automatic camera
  seed dispersal by marten 29

B
bacteria
  food webs and heterotrophic microbial process 151
  prokaryotic and viral diversity 183
bark stripping
  bark stripping of hinoki cypress by sika deer 545
base mineral enrichment
  base mineral inflow in a remnant mire 601
bat distribution
  cave-dwelling bats 69
batracophagy
  diet of an endangered aquatic insect 655
benthos
  impacts of dugongs on benthic communities 625
biodiversity
  competitive chaos 175
  pelagic food webs 143
biogenic structures
  functional domains in soils 441
biogeochemical cycles
  food webs and heterotrophic microbial process 151
biogeography
  food webs and heterotrophic microbial process 151
biomass
  common allometric equation for mangroves 415
  fertility level and self-thinning 17
  shade timing on horsetail populations 673
bird strategies
  bird strategies and habitat changes 339
bluegill
  trophic polymorphism in introduced fish 49
body mass
  changes in shrike body mass 411
bomb carbon
  termite ecology by stable and radioisotopes 195
Bombus ardens
  estimating bumble bee colony locations 39
Bombus diversus
  estimating bumble bee colony locations 39
boreal
  growth responses to experimental warming 125

bottom-up
inter-hemispheric bottom-up effects 1
resource-driven interaction webs 241
breeding birds
bird strategies and habitat changes 339
changes in shrike body mass 411
influence of the red fox on bird distribution 395
brood size
prudent investment in bull-headed shrikes 617
bull-headed shrike
changes in shrike body mass 411
prudent investment in bull-headed shrikes 617

C
camera trap
internet observation of wildlife 119
capsule
splash seed dispersal by raindrops 663
^{13}C discrimination
PNUE at different altitudes 305
carbon cycling
food webs and heterotrophic microbial process 151
cave-dwelling bats
cave-dwelling bats 69
chaos
competitive chaos 175
Chiroptera
cave-dwelling bats 69
Cirsium vulgare
naturalized thistle and *E. pustolosa* 275
cladocerans
mesozooplankton functional groups 161
classification
vegetation gradients in a peatland 505
climate
food webs and heterotrophic microbial process 151
male aggression and diapause in mites 645
pelagic food webs 143
clinal variation
male aggression and diapause in mites 645
clonal growth forms
clonal plants and species diversity 705
clonal plants
clonal plants and species diversity 705
coexistence
competitive chaos 175
common allometric relationships
common allometric equation for mangroves 415
community
impacts of dugongs on benthic communities 625
co-dominants in ecological communities 519
compartmentalization
resource partitioning and food web stability 419
compensatory shoot growth
spittlebug oviposition affects shoot growth 535
competition
competitive chaos 175
consumer-driven succession 249
fertility level and self-thinning 17
growth responses to experimental warming 125
light and prairie plant competition 591
conditional strategy
factors causing variation in flock size 361
conservation
bird strategies and habitat changes 339
insect populations and habitat fragments 229
contaminants
pelagic food webs 143
cool temperate deciduous forest
rainfall events on soil CO_2 flux 401
copepods
mesozooplankton functional groups 161
Cryptophis nigrescens
life histories of two sympatric snakes 59
CyberHunter Matagi
internet observation of wildlife 119
cycloheximide
microflagellate effect on virus loss 473

D
deceptive pollination
floral sexual dimorphism in *A. quinata* 295
decomposer food webs
characteristics of soil food webs 207
defense
territorial defense by ayu 373
diet
diet of an endangered aquatic insect 655
trophic polymorphism in introduced fish 49
DISTANCE
distribution and abundance of seals 79
distribution
allometry and life history of *P. coronata* 323
disturbance
impacts of dugongs on benthic communities 625
diversity
co-dominants in ecological communities 519

domestication
phytoalexin defense in *Phaseolus* beans 315
dominance
co-dominants in ecological communities 519
dugong foraging
impacts of dugongs on benthic communities 625

E
Echinacea purpurea
light and prairie plant competition 591
ecosystem
functional domains in soils 441
characteristics of soil food webs 207
elasticity
life histories of two sympatric snakes 59
endangered aquatic insect
diet of an endangered aquatic insect 655
energetics
resource partitioning and food web stability 419
Epilachna pustolosa
naturalized thistle and *E. pustolosa* 275
Equisetum arvense
shade timing on horsetail populations 673
estimating colony locations
estimating bumble bee colony locations 39
exploited aquatic resources
pelagic food webs 143
extinction
life histories of two sympatric snakes 59

F
feeding
termite ecology by stable and radioisotopes 195
territorial defense by ayu 373
fen
dwarf communities in nitrogen-rich habitats 109
floaral dimorphism
floral sexual dimorphism in *A. quinata* 295
flock size
factors causing variation in flock size 361
fluctuation
vegetation gradients in a peatland 505
fluorescent *in situ* hybridisation
prokaryotic and viral diversity 183
food availability
bark stripping of hinoki cypress by sika deer 545
diet of an endangered aquatic insect 655
food chain length
food webs in river networks 451
spatial effects on food webs 261
food web
food webs in river networks 451
functional domains in soils 441
mesozooplankton functional groups 161
resource partitioning and food web stability 419
soil food webs and plant communities 217
foraging modes
ontogeny of frog feeding ecology 639
forest structure
nitrogen use by canopy and subcanopy trees 695
fox
influence of the red fox on bird distribution 395
frost heave
survivorship of *Pinus pumila* seedlings 481
fruit morphology
seed dispersal by marten 29

G
geitonogamous pollination
floral sexual dimorphism in *A. quinata* 295
generalized system
important pollinators of *Geranium thunbergii* 283
geographic information system
habitat evaluation for crested ibis 565
global environmental changes
pelagic food webs 143
global ocean
food webs and heterotrophic microbial process 151
growth
tree mortality in northern Japan 575
guerilla
clonal plants and species diversity 705

H
habitat
bird strategies and habitat changes 339
clonal plants and species diversity 705
distribution and abundance of seals 79
estimating bumble bee colony locations 39
habitat evaluation for crested ibis 565
habitat suitability index
habitat evaluation for crested ibis 565
hemispherical photography
seasonality of light conditions 687
herbage consumption
spatial heterogeneity in a pasture 381
herbivorous insects
deer browsing reduces leaf damage by insects 527

heterogeneous light conditions
seasonality of light conditions 687
heterotrophic nanoflagellates
microflagellate effect on virus loss 473
hinoki cypress
bark stripping of hinoki cypress by sika deer 545
Hokkaido
distribution and abundance of seals 79
Hoplocephalus bungaroides
life histories of two sympatric snakes 59
horse pasturage
dwarf communities in nitrogen-rich habitats 109
hunger level
factors causing variation in flock size 361
hydrological regime
base mineral inflow in a remnant mire 601
hydroscopic movement
splash seed dispersal by raindrops 663
hypereutrophic pond
microflagellate effect on virus loss 473

I
indirect
consumer-driven succession 249
deer browsing reduces leaf damage by insects 527
induced response
deer browsing reduces leaf damage by insects 527
ingestion
microflagellate effect on virus loss 473
spatial heterogeneity in a pasture 381
inhibition succession
consumer-driven succession 249
insect
soil food webs and plant communities 217
insect herbivores
resource-driven interaction webs 241
insurance
territorial defense by ayu 373
international tundra experiment
growth responses to experimental warming 125
internet
internet observation of wildlife 119
intertidal communities
consumer-driven succession 249
intraguild predation
resource partitioning and food web stability 419
introduced species
trophic polymorphism in introduced fish 49
isoflavonoids
phytoalexin defense in *Phaseolus* beans 315
Isoptera
termite ecology by stable and radioisotopes 195

J
Japan
vegetation gradients in a peatland 505
Japanese subalpine
survivorship of *Pinus pumila* seedlings 481

L
Lake Baikal
nutritional diagnosis in Lake Baikal 135
Lake Biwa
trophic polymorphism in introduced fish 49
landscape
food webs in river networks 451
insect populations and habitat fragments 229
Lanius bucephalus
changes in shrike body mass 411
prudent investment in bull-headed shrikes 617
large herbivore
spatial heterogeneity in a pasture 381
Larix gmelinii
source of plant water in east Siberia 493
larval performance
naturalized thistle and *E. pustolosa* 275
leaf nitrogen
PNUE at different altitudes 305
leaf phenology
seasonality of light conditions 687
leaf–air vapor pressure difference
gas exchange and morphology of *E. japonicum* sp. 97
life history
allometry and life history of *P. coronata* 323
life histories of two sympatric snakes 59
light
light and prairie plant competition 591
line-transect method
distribution and abundance of seals 79
living plants
resource-driven interaction webs 241

M
mammalian herbivory
deer browsing reduces leaf damage by insects 527
mangrove
common allometric equation for mangroves 415

marine pelagic ecosystems
pelagic food webs 143
Martes melampus
seed dispersal by marten 29
mathematical models
seasonal subsidy and food web stability 433
matter production
shade timing on horsetail populations 673
mesozooplankton
mesozooplankton functional groups 161
metacommunity
spatial effects on food webs 261
microbial food web
food webs and heterotrophic microbial process 151
micro-environmental factors
gas exchange and morphology of *E. japonicum* sp. 97
monocotyledon
allometry and life history of *P. coronata* 323
morphology
ontogeny of frog feeding ecology 639
trophic polymorphism in introduced fish 49
mortality
tree mortality in northern Japan 575
Mount Kinabalu
PNUE at different altitudes 305
moving average model
estimating bumble bee colony locations 39
Myrmecina nipponica
effects of worker manipulation on sex ratio 717
Mytilus
consumer-driven succession 249

N
naturalized plants
naturalized thistle and *E. pustolosa* 275
nestling body mass hierarchy
prudent investment in bull-headed shrikes 617
Nipponia nippon
habitat evaluation for crested ibis 565
nitrogen
dwarf communities in nitrogen-rich habitats 109
non-random association
factors causing variation in flock size 361
northern Japan
tree mortality in northern Japan 575
northwestern Turkey
cave-dwelling bats 69
Nucella
consumer-driven succession 249
nutcracker seed dispersal
survivorship of *Pinus pumila* seedlings 481
nutrients
characteristics of soil food webs 207
effects of worker manipulation on sex ratio 717
nitrogen use by canopy and subcanopy trees 695
nutritional diagnosis in Lake Baikal 135
pelagic food webs 143

O
Ocimum basilicum
fertility level and self-thinning 17
omnivory
characteristics of soil food webs 207
open-top chamber
growth responses to experimental warming 125
ordination
vegetation gradients in a peatland 505
oxidation–reduction potential
dwarf communities in nitrogen-rich habitats 109
oxygen isotope
source of plant water in east Siberia 493

P
Panicum virgatum
light and prairie plant competition 591
parasitoids
resource-driven interaction webs 241
Pasania edulis
acorn hoarding and regeneration of *Pasania* 553
patch selection
spatial heterogeneity in a pasture 381
perennial weed
shade timing on horsetail populations 673
permafrost
source of plant water in east Siberia 493
persistence
resource partitioning and food web stability 419
seasonal subsidy and food web stability 433
phalanx
clonal plants and species diversity 705
Phaseolus vulgaris
phytoalexin defense in *Phaseolus* beans 315
phenology
male aggression and diapause in mites 645
photosynthesis
light and prairie plant competition 591
PNUE at different altitudes 305
phytoalexins
phytoalexin defense in *Phaseolus* beans 315

phytoplankton
food webs and heterotrophic microbial process 151
nutritional diagnosis in Lake Baikal 135
Pinanga
allometry and life history of *P. coronata* 323
Pinus pumila
survivorship of *Pinus pumila* seedlings 481
plant community
clonal plants and species diversity 705
soil food webs and plant communities 217
point counts
influence of the red fox on bird distribution 395
pollination efficiency
important pollinators of *Geranium thunbergii* 283
population processes
acorn hoarding and regeneration of *Pasania* 553
postdispersal predation
acorn hoarding and regeneration of *Pasania* 553
postmetamorphic ontogeny
ontogeny of frog feeding ecology 639
prairie
light and prairie plant competition 591
predation
influence of the red fox on bird distribution 395
inter-hemispheric bottom-up effects 1
prey selection
ontogeny of frog feeding ecology 639
pteridophyte
shade timing on horsetail populations 673
pulsed field gel electrophoresis
prokaryotic and viral diversity 183

R
rain
splash seed dispersal by raindrops 663
rainfall events on soil CO_2 flux 401
raised bog
vegetation gradients in a peatland 505
Rana nigromaculata
ontogeny of frog feeding ecology 639
Ratibiba pinnata
light and prairie plant competition 591
ratio
gas exchange and morphology of *E. japonicum* sp. 97
recruitment
inter-hemispheric bottom-up effects 1
Redfield ratio
nutritional diagnosis in Lake Baikal 135
remnant mire
base mineral inflow in a remnant mire 601
remote observation
internet observation of wildlife 119
reserve design
insect populations and habitat fragments 229
resistance
phytoalexin defense in *Phaseolus* beans 315
resorption
nitrogen use by canopy and subcanopy trees 695
resource competition
competitive chaos 175
resource partitioning
resource partitioning and food web stability 419
resource ratio
nitrogen use by canopy and subcanopy trees 695
rice-field ecosystems
diet of an endangered aquatic insect 655
river networks
food webs in river networks 451
root competition
fertility level and self-thinning 17
root herbivory
soil food webs and plant communities 217

S
Salix miyabeana
spittlebug oviposition affects shoot growth 535
Salix sachalinensis
spittlebug oviposition affects shoot growth 535
sap water
source of plant water in east Siberia 493
scale dependence
insect populations and habitat fragments 229
seasonal change
prudent investment in bull-headed shrikes 617
seasonality of light conditions 687
seasonal subsidy and food web stability 433
seed dispersal
seed dispersal by marten 29
seedling establishment
survivorship of *Pinus pumila* seedlings 481
seed-set
important pollinators of *Geranium thunbergii* 283
self-thinning
fertility level and self-thinning 17

sex ratio
effects of worker manipulation on sex ratio 717
sexual selection
male aggression and diapause in mites 645
shoot competition
fertility level and self-thinning 17
sika deer
bark stripping of hinoki cypress by sika deer 545
Simpson's index
co-dominants in ecological communities 519
snow cover
bark stripping of hinoki cypress by sika deer 545
soil
base mineral inflow in a remnant mire 601
functional domains in soils 441
nitrogen use by canopy and subcanopy trees 695
rainfall events on soil CO_2 flux 401
spatial
resource partitioning and food web stability 419
spatial effects on food webs 261
spatial heterogeneity in a pasture 381
specific gravity of stem
common allometric equation for mangroves 415
Sphagnum subfulvum
base mineral inflow in a remnant mire 601
splash seed dispersal
splash seed dispersal by raindrops 663
stem weight
common allometric equation for mangroves 415
stochastic disturbance
factors causing variation in flock size 361
stomatal conductance
gas exchange and morphology of *E. japonicum* sp. 97
stomatal density
gas exchange and morphology of *E. japonicum* sp. 97
stream ecosystems
food webs in river networks 451
subalphine shrubland
seed dispersal by marten 29
sub-boreal forest
tree mortality in northern Japan 575
superterritory
territorial defense by ayu 373

T
taiga
source of plant water in east Siberia 493
temporal heterogeneity
seasonal subsidy and food web stability 433
terminal restriction fragment length polymorphism
prokaryotic and viral diversity 183
Termitidae
termite ecology by stable and radioisotopes 195
top-down
inter-hemispheric bottom-up effects 1
topography
allometry and life history of *P. coronata* 323
trophic
insect populations and habitat fragments 229
trophic polymorphism in introduced fish 49
resource partitioning and food web stability 419
tropical montane forest
allometry and life history of *P. coronata* 323
tropical seagrass bed
impacts of dugongs on benthic communities 625
tropics
termite ecology by stable and radioisotopes 195
tunicates
mesozooplankton functional groups 161

U
understory community
seasonality of light conditions 687
unisexual flowers
floral sexual dimorphism in *A. quinata* 295
upwelling
inter-hemispheric bottom-up effects 1

V
Viburnum dilatatum
deer browsing reduces leaf damage by insects 527
virus-like particles
microflagellate effect on virus loss 473
visit duration
important pollinators of *Geranium thunbergii* 283
visitation frequency
important pollinators of *Geranium thunbergii* 283
Vulpes vulpes
influence of the red fox on bird distribution 395

W
water potential in leaf
gas exchange and morphology of *E. japonicum* sp. 97
worker manipulation
effects of worker manipulation on sex ratio 717

Z
zooplankton
food webs and heterotrophic microbial process 151
